Re: W-01445A-06-0199 et al. – Arizona Water Company et al. (CC&N Extension) (Oral Argument on Motion to Dismiss)

Dear Commissioners:

As developers and partners of over 2500 acres of land in the above referenced service area, we are seeking the most comprehensive, technologically advanced system we can for our Master Planned Communities. The level of growth in this area of Pinal County requires that water and wastewater be integrated as a seamless resource.

Only Global Water Resources has the ability in this area, by using reclaimed water to offset potable water use, to allow development to move forward as planned. Their excellent large-scale utility planning, engineering and proven record of accomplishment of delivering sizeable projects on time, made possible our ability to make a substantial financial investment in this area of Pinal County.

Global Water has consistently demonstrated their commitment to an environmentally responsible approach to providing a pure and dependable water supply. While reclamation and reuse requires a greater initial expenditure, it is the only conscionable way to operate in consideration of future generations.

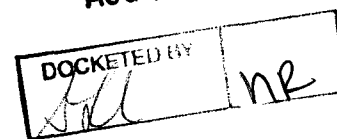

Having Global as our utility provider is critical to the success of our projects and others in this area. The encumbrance of the CC&N application for our selected provider, Global, by Arizona Water Company, is severely compromising our ability to create a viable solution for our 8500 lots and their future residents. We respectfully request that you reject Arizona Water Company's action of filing for a 108 section extension of their CC&N.

Sincerely,
Westpac Development Corporation

Michael Martindale
